EXECUTIVE SUMMARY

- **Lighting & Technical Focus:** Computer Science undergraduate with an emphasis in Animation, combining rigorous programming skills (Python, C++) with hands-on experience in 3D lighting, rendering, compositing, and pipeline tool development.
- **Feature Animation Passion:** Eager to collaborate with CG Supervisors and Lead Lighters to achieve visual targets, troubleshoot technical issues, and take shots to completion.
- **Relevant Coursework:** Lighting for 3D Graphics, Advanced graphics and rendering, Scripting for Animation, Adv Software Construction, Data Structures, Computer Systems, Special Problems in Animation.

EDUCATION

Brigham Young University Expected Apr 2028
Bachelor of Computer Science, Emphasis in Animation, 3.88 GPA Provo, UT

- **Honors & Activities**: Women in Computer Science Club Officer, 2D Animation Club, Lighter for Sophomore Film (2025), Producer of Sophomore Film (2026), Technical Director for capstone game

Academy of Art University July 2020

- Certificate, Pre-College Program San Francisco, CA

SKILLS

- **Industry Software**: Maya, Houdini, Unreal Engine, Nuke, Arnold, RenderMan, Adobe Creative Suite, Autodesk Flow Production Tracking (ShotGrid)
- **Programming Languages**: Python, C, C++, Java, MEL
- **Skills:** 3D Lighting & Rendering, Compositing, Pipeline Integration, Creative & Technical Troubleshooting, Cross-Departmental Collaboration, Time Management

EXPERIENCE

Student Film - BYU*, Provo, UT* May 2026 - Aug 2026
Producer, Lighter, Technical Director

- Spearheaded the student production, collaborating closely with leads to achieve target aesthetics and meet deadlines.
- Managed a 20+ person team to deliver a 2-minute animated short over a 14-week production cycle
- Developed custom Python pipeline tools for Maya, Unreal Engine, and Autodesk Flow Production Tracking to streamline daily workflows and asset tracking, faster rendering, and specialized lighting.

BYU Computer Science Department, *Provo, UT* Jan 2026 - Ongoing
CSR/IT Specialist

- Maintained, troubleshot, and supported industry-standard animation software (Maya, Houdini, Arnold, RenderMan, Adobe) in a high-performance lab environment.
- Engineered cross-platform virtual environments (Linux servers paired with Windows/Mac VMs) to guarantee 99% system availability and support remote rendering during peak production cycles.

SCHR8RTOT Productions, *Provo, UT* Aug 2025 - May 2026
Freelance Tech Artist

- Engineered custom Blender tools for an animated studio pitch, reducing character modeling and asset turnaround time by 20%.
- Translated creative requirements from former Sony animators into technical specifications, maintaining high productivity and delivering render-ready assets ahead of deadlines.

LANGUAGES - English, Latin (National Latin Exam Silver Medalist)
